

Sonja Zweegman

Sonja Zweegman, MD, PhD, is head of the Department of Hematology, VU University Medical Center, in Amsterdam, The Netherlands. She completed her medical degree at Erasmus University in Rotterdam, The Netherlands, and subsequently took up residencies in internal medicine and in hematology at the VU University Medical Center.

Professor Zweegman's current research interests include imaging and gene expression profiling studies in multiple myeloma in order to unravel the molecular background of bone disease. In addition, she participates in bortezomib resistance research in leukemia and multiple myeloma. She is the principal investigator of several international studies for elderly multiple myeloma patients. Since 2013, professor Zweegman has been vice-chairman of the HOVON (the Hemato-Oncology Foundation for Adults in The Netherlands) Multiple Myeloma Working Group. She is author or co-author of a number of books and many papers published in peer-reviewed journals.
